

# Labels

Labels are used throughout the Agile User Interface to identify the nature of the information displayed or edited by a UI control. Labels create name/value pairs that are the fundamental building blocks of forms.

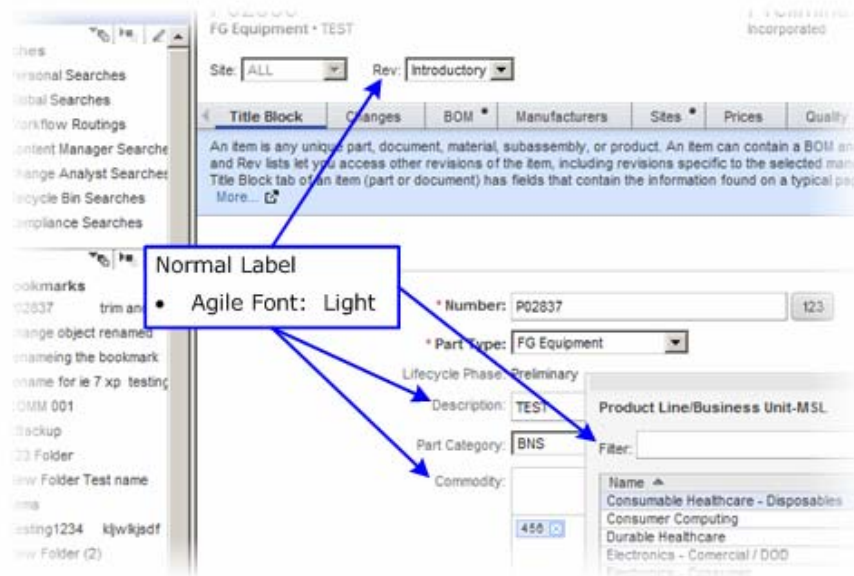

All labels are language localizable.

## Element Specification

## Normal Labels

Labels in the Agile User Interface are rendered in an understated gray font that is lighter than the normal font (and most variations thereof) used to display data values. The label is important, but the emphasis is on the data.

### *Behavior (Labels on Editable UI Elements)*

#### Mouse Buttons

- Click Transfers focus to the UI element associated with the label.

#### Mouse Over

- cursor pointer

### *Behavior (all other Labels)*

#### Mouse Over

- cursor I beam

## Required Labels

If a value is required in order to successfully fill out a form, then its label will be displayed in the Required Label format.

### *Behavior (Labels on Editable Form Fields)*

- As Normal Labels plus

#### **Mouse Over**

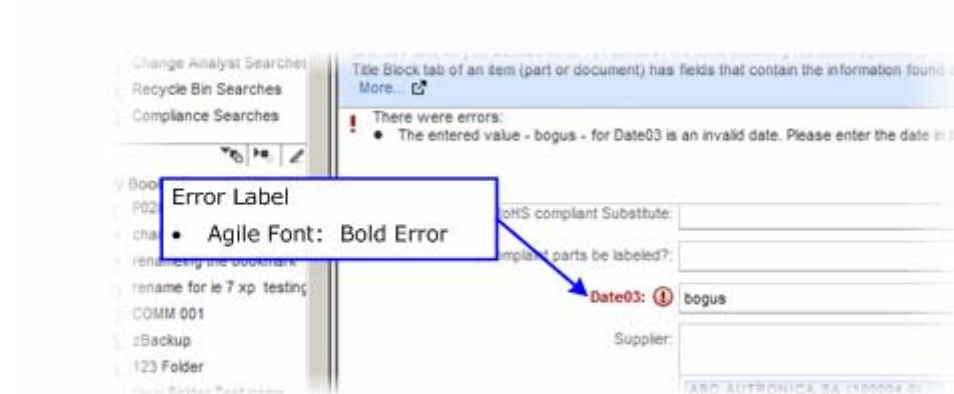

- Tool Tip

"LABEL is required"

where LABEL is the text value of the label for this required field.

## Error Labels

When the user enters a data value (or fails to enter a required value) into a form, an error will occur when the user tries to save the form. When the form is redisplayed so that the user can correct it, all fields that have errors will be emphasized by the use of Error Labels.

### *Behavior (Labels on Editable Form Fields)*

- As Normal Labels

## Issues

- 1) If the label is on an editable UI element, then clicking on the label should set the focus on the element. On the QA server as of 8/7/07, this works as documented on most form elements (but not all — see UOM, Money, Cascade List, Multi-Cascade List). Nor does it work on some elements outside the form (see Site: and Rev: in the object header).

## Change History

November 20, 2007	Vern McGeorge	Revised to leverage definition of Agile Bold Error Font.
October 30, 2007	Vern McGeorge	Renamed for consistency with Buttons, Tabs, etc.
August 23, 2007	Vern McGeorge	Complete.
August 16, 2007	Vern McGeorge	Reorganized to Joel's specifications.
August 9, 2007	Vern McGeorge	Reorganized and published for review.
April 24, 2007	Vern McGeorge	Published for acceptance of final draft.
April 23, 2007	Vern McGeorge	Published for third review.
April 17, 2007	Vern McGeorge	Published for second review.
April 10, 2007	Vern McGeorge	Reconstructed from file system corruption.
March 30, 2007	Vern McGeorge	Second draft (as excised from text.doc)
March 23, 2007	Vern McGeorge	First draft (as part of text.doc)
